

# Jonathan DiCecco

diceccoj@mcmaster.ca | 416-268-4810 | Mississauga, ON (L5N 7L5)

[Portfolio](#) | [LinkedIn](#) | [Github](#)

I'm a Computer Science student with 7+ years of experience in data analytics, software development, and full-stack engineering. I have multiple opportunities of building production tools, automating workflows, and delivering insights across data-heavy environments.

## Education

**McMaster University - BAsC. Honours Computer Science Co-Op** | Python, C, C++, Haskell, Java, SQL

**Relevant Courses:** Application of Machine Learning, Human-Computer Interfaces, Databases

**Extracurricular:** Computer Science Society (Events Logistics Lead, Mentorship), Solar Car (Frontend Development)

## Technical Skills

**Languages:** Python, React, Next.js, TypeScript, Javascript, C#, SQL, Pandas, NumPy, VBA, Java, C/C++

**Tools/Frameworks:** Power BI, Excel, Power Query, AWS, Django, UI/UX, Unity, Game Development, Frontend/Fullstack Development

## Work Experience

**Data Support Co-Op** | VBA, Python, NumPy, Pandas, Power Query, Excel, Version Control, TortoiseSVN

**ATS Life Sciences | Cambridge, ON (Hybrid) | January 2025 - August 2025**

- Built toolsets tool sets for other employees and customers with software developers using Excel/VBA.
- Automated data cleaning/preprocessing pipeline using Power Query and Pandas, reducing manual reporting time by 40%.
- Made advancements by helping team integrate Python into graphical tools, boosting team-wide efficiency and application potential
- Collaborated with team members and other software developers to increase automation speed and performance gains using the applications

**IT Cherwell Admin** | Excel, Cherwell Software, Power BI

**CAA Insurance | Vaughan, ON (Remote) | May 2024 - August 2024**

- Automated data retrieval from company database using SQL and Cherwell software, increasing efficiency by 30%.
- Optimized company database by using Cherwell to update or cleanup thousands of servers' information.
- Worked with team in designing an employee onboarding form for the company, discovering dozens of errors and assisted in finding fixes.
- Collaborated with fellow employees to fill in missing information for unknown servers

**Jr. Data Analyst** | Python, Pandas, Excel, Power BI, Power Automate

**Clearbox Retail | Mississauga, ON (Remote) | May 2023 - August 2023**

- Identified and capitalized on \$15M in actionable revenue, utilizing Sobey's IRI data
- Acquired and evaluated \$400M of sales data to support Gay Lea Foods client, providing supply chain and store-level opportunities for a large Canadian dairy company
- Spearheaded the integration of error-handling mechanisms to ensure the resolution of data issues
- Converted files to Excel via Python scripting while ensuring high levels of quality assurance
- Developed data visualization dashboards in Power BI

## Hackathons and Projects

**Capstone Project - Geckode Block Coding Website** | React, Next.js, Typescript, Python, Django

Creating a responsive, educational web application to provide a block coding interface for children to learn how to code through making video games. Complete with user and organization authentication, user collaboration via websockets.

**Google Developer Students Club Hackathon - Chatbot (Finalist)** | Python, Firebase, OpenAI, UI/UX

Developed a fast and responsive full-stack chat bot OpenAI's REST API and Python to guide those in mental health crises to seek help or unwind. Used Google's Firebase to create login information for the user.

**Art Portfolio Website** | React, Typescript, Python, Django, AWS, UI/UX

Developed a responsive, fluid, full-stack art portfolio using a React frontend and a django backend with an AWS S3 bucket. Used self-created REST API to manage incoming posts, images, and edits. Complete with dynamic user interface for both visitors and artists.
